

Connecting health professionals to online learning

The Learning Hub

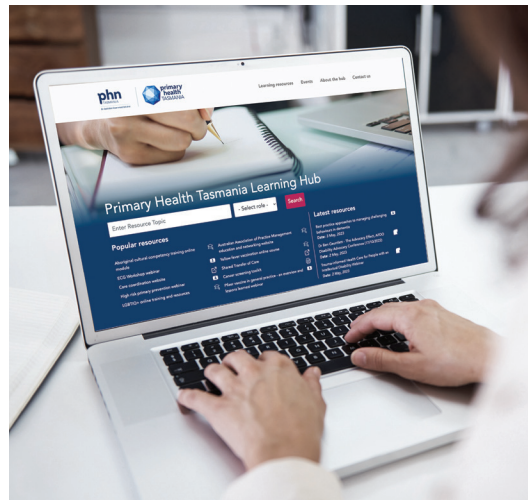

Primary Health Tasmania's Learning Hub is an online portal connecting health professionals to high-quality educational resources and tools.

The Hub makes it as easy as possible for primary healthcare professionals to access free resources developed by Primary Health Tasmania and other Primary Health Networks or peak bodies.

It gives access to resources such as:

- webinars
- audio recordings
- publications
- infographics.

Our Learning Hub is designed to be searched by topic of interest so that suites of relevant resources can be collated for the user. Healthcare professionals can also search resource types, or browse at their leisure.
